

Dear Little Girls:

Another week has just flown by. I can remember a year ago tomorrow as if it were just yesterday. That was the day the ships came to Thule and the day we took off to come back to Peppervell from our tour of the Command. It is really too bad that in that years time I've been so close yet have learned so little about the arctic.

Well in about two and a half months I'll be learning about the Training Command again, I hope.

I had dinner with Major and Mrs Clark last night. They have a little girl about Kathleen's age who already goes to a Newfoundland school. They say its better to go on a put the children in school even if you have to take them out when you move.

I wish that I had another trip to the States to look forward to. These next few weeks will pass fast but if I could break them up with a little Iy it would help.

I have mom a tea set and I'll send it along in a day or two. Can you think of anything your mom might want while I'm here. Better get your order in soon.

I had a belated letter from Wheeler the other day. He has an assistantship open in Sept. that will pay \$2400. It is a little late now but I'll tell him maybe in mid term or next fall. I'm still not anxious to return to LNU especially under Wheeler and Clifton.

Hope you like the slide of Fayetteville Trip.

I love you very much my Darling and am just living for the day —

Billy
